

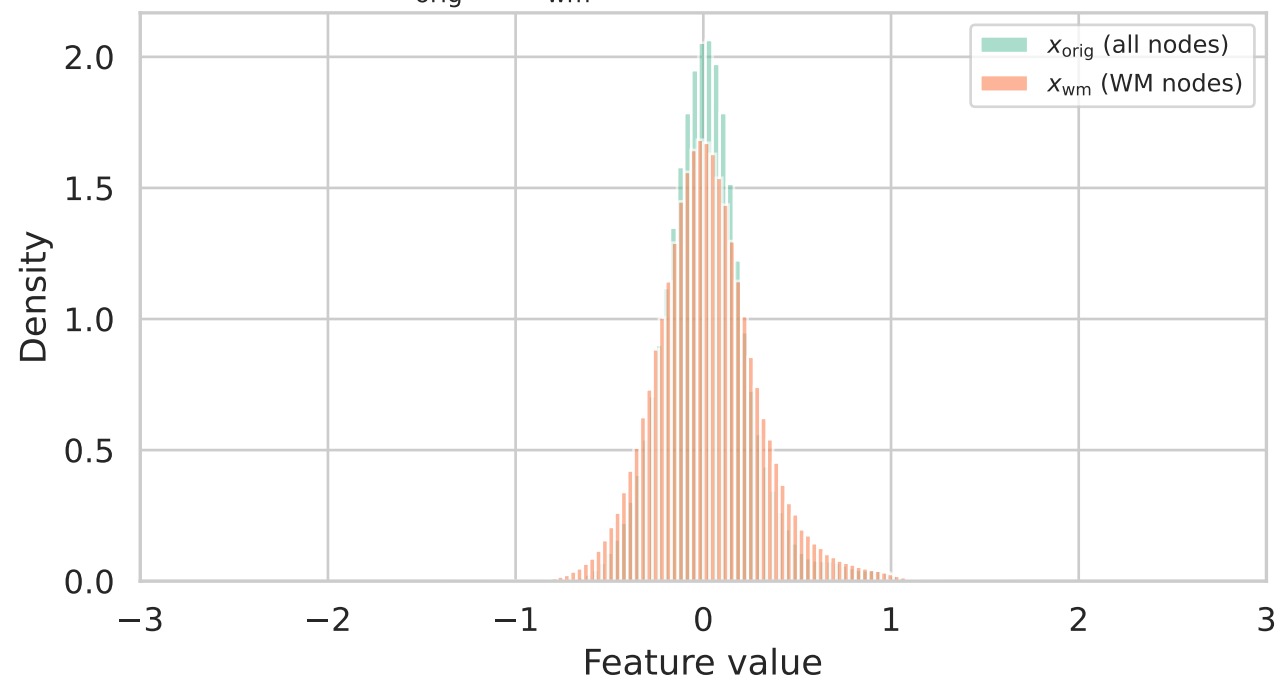

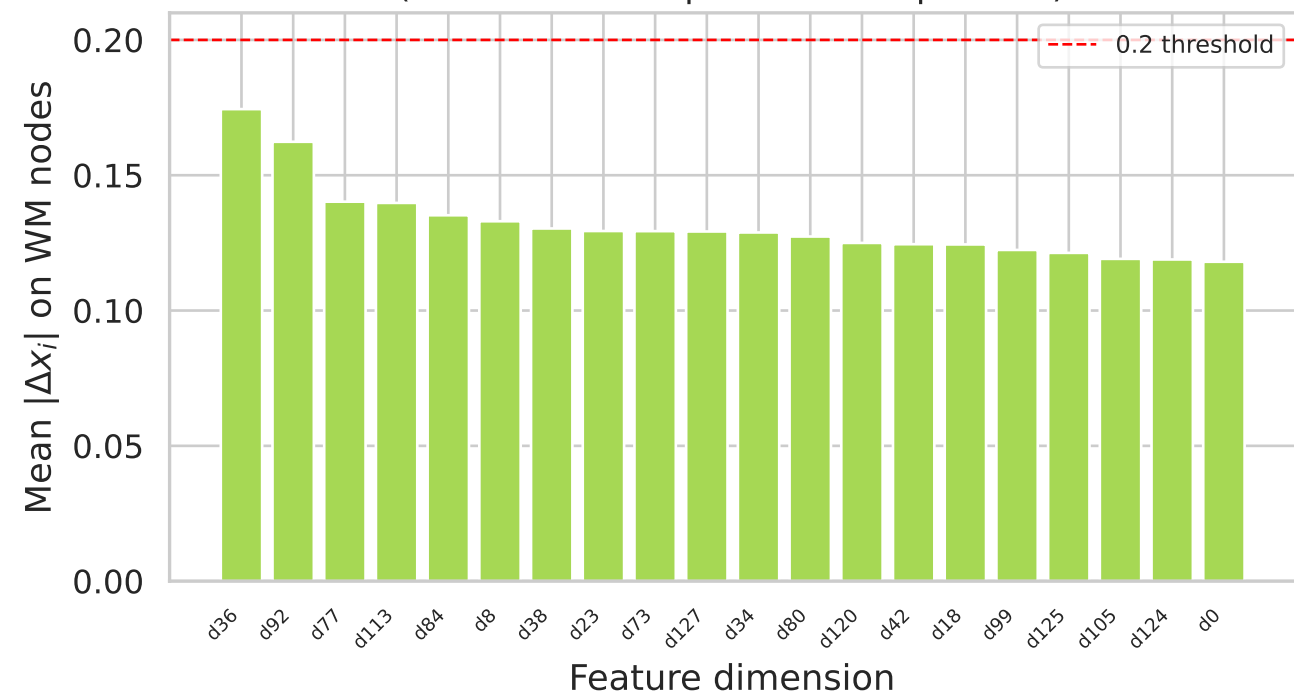

# Figure 2 — Feature Space & Perturbation Profile

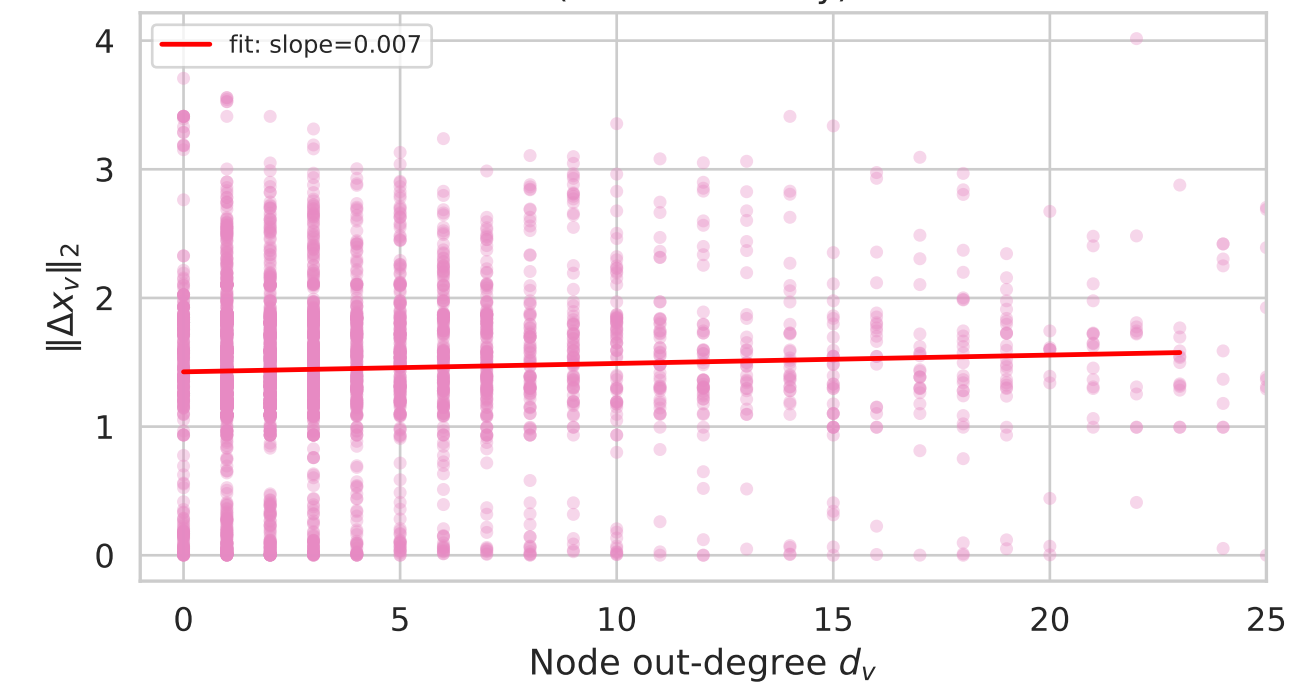

(a) Feature value distribution  
 $x_{\text{orig}}$  vs  $x_{\text{wm}}$  on watermarked nodes

(b) Top-20 perturbed feature dimensions  
(mean absolute perturbation per dim)

(c) Perturbation magnitude vs. node degree  
(WM nodes only)

(d) Per-class perturbation magnitude  
(WM nodes, boxplot per class)
