

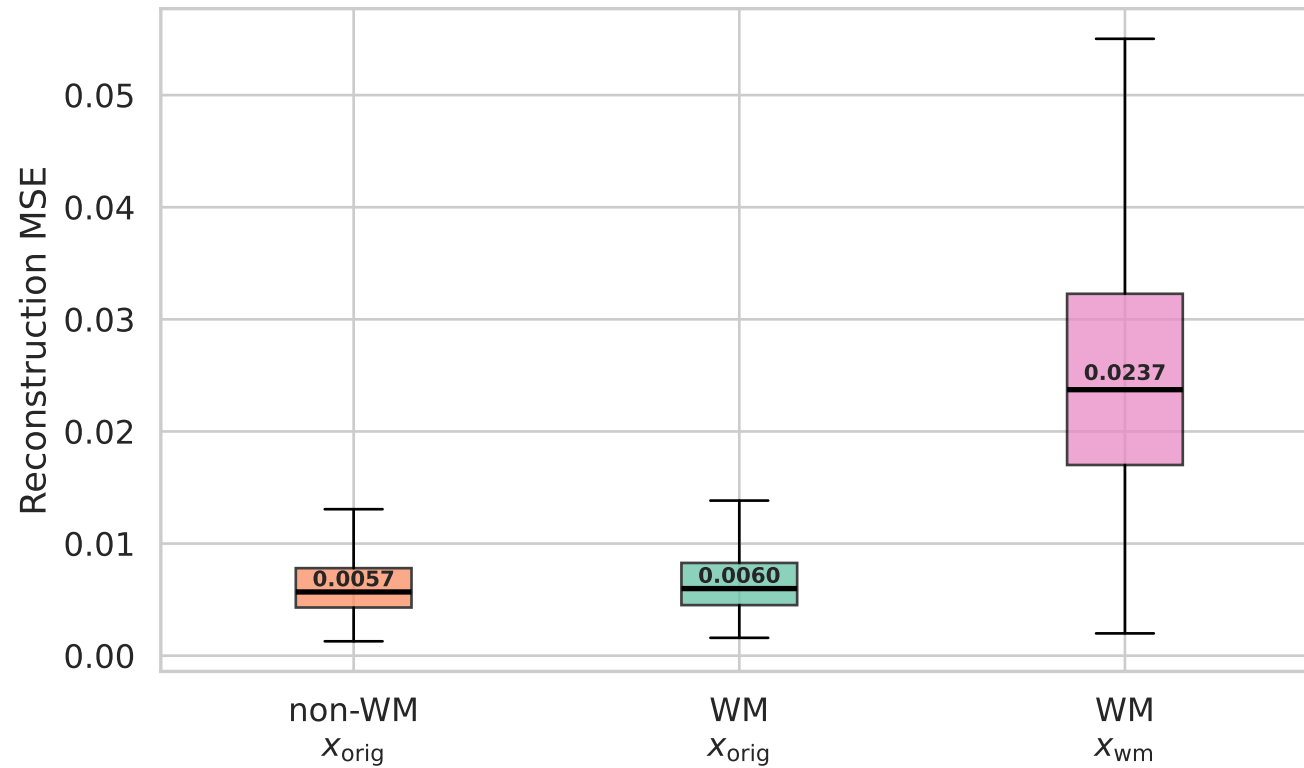

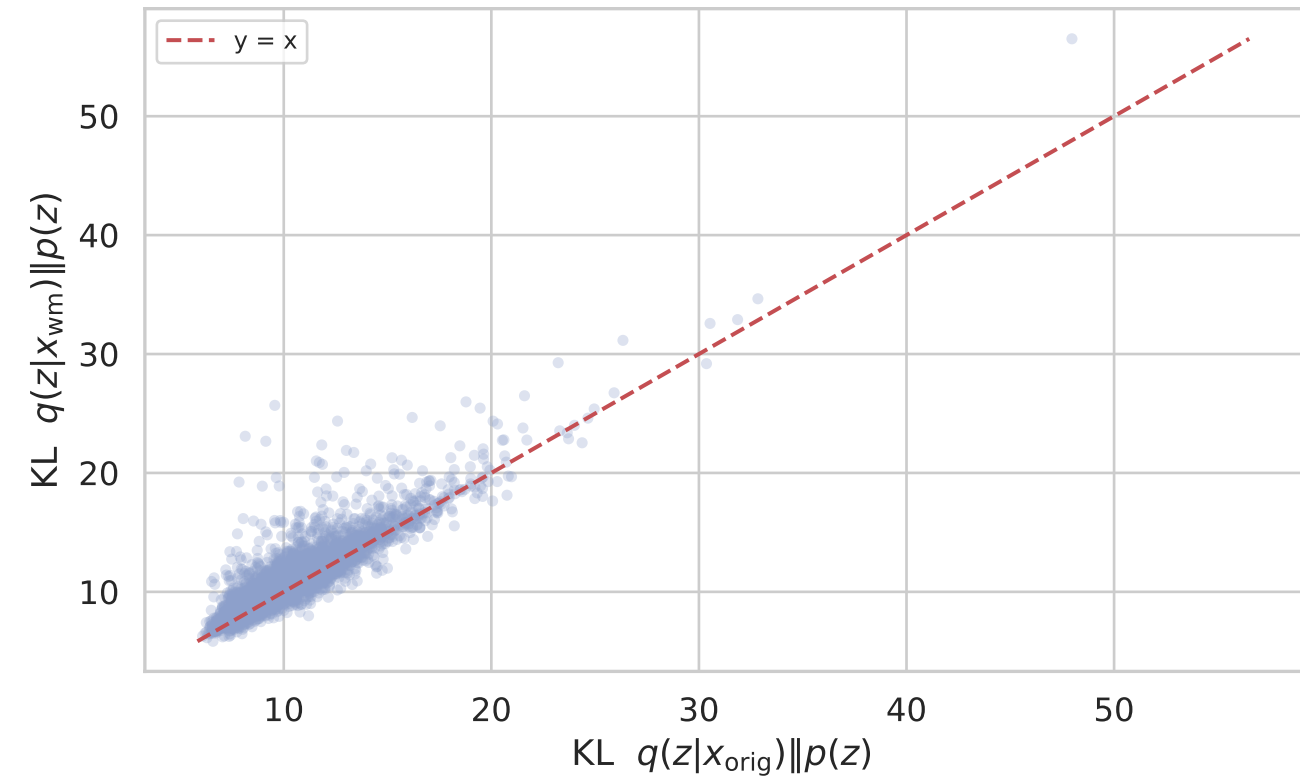

Figure 5 — VAE Evaluation: Feature-Space Analysis

(a) Reconstruction error by group

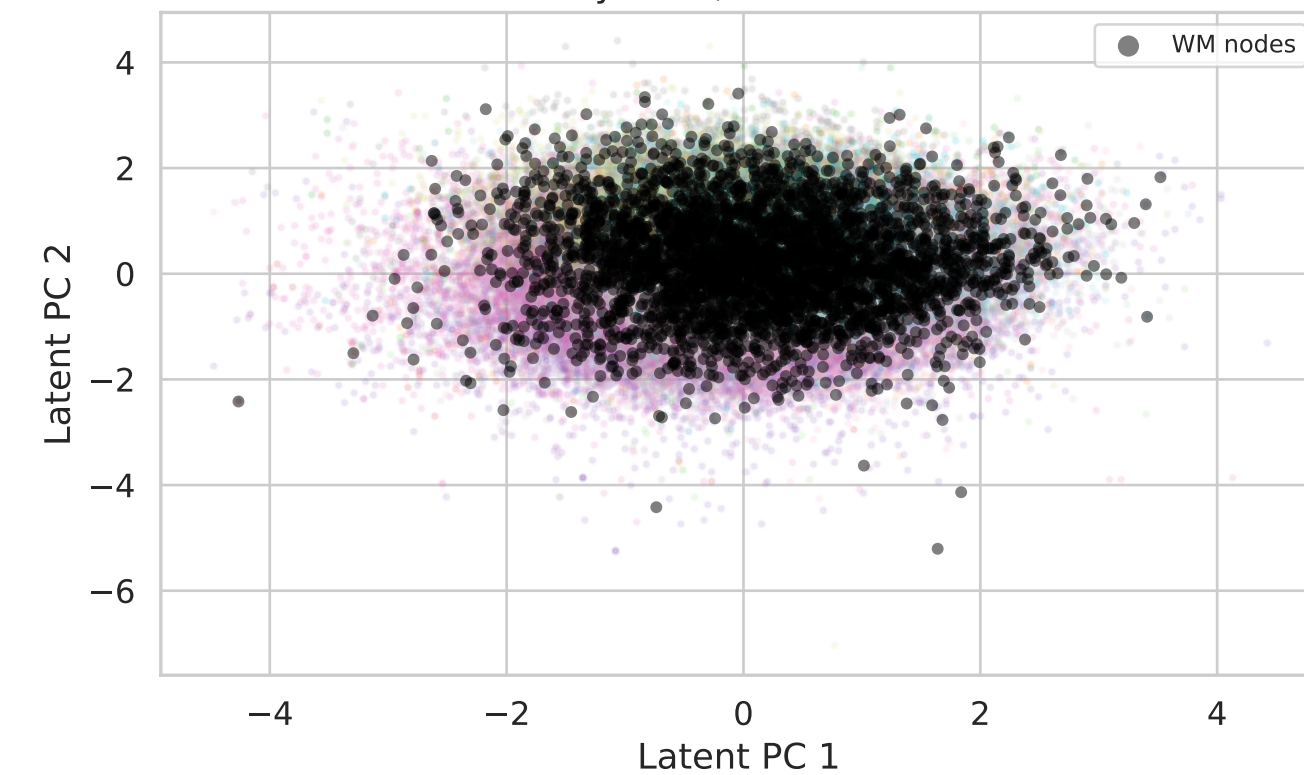

(b) KL divergence: X_{orig} vs X_{wm}

(WM nodes — points above diagonal = watermark increases KL)

(c) VAE latent space (z -dim=16, projected to 2D)
coloured by class, WM nodes in black

(d) Latent-space shift for WM nodes
(200 sampled, arrows: $X_{\text{orig}} \rightarrow X_{\text{wm}}$)
